

Customer Success Story

Client protects highly sensitive content from unauthorized access with ATEM's Infrastructure Security Management Solution implementation

www.theatem.com

Client: Banking Institution

Industry: BFSI

Location: Pleasanton, CA

Employees: 49,000

Project: Identity Management &
RBAC

Duration: 24 Months

Hardware: Dell PowerEdge, EMC
SAN, CISCO, QLogic

Software: MS Windows NT,
RHEL; IIS, Apache,
WebSphere Application
Server; SiteMinder, SunOne
Directory Server, Oracle 10g

Business:

Client with its history dating back to 1800s and its subsidiary banks currently operate approximately 2,500 consumer and small business banking stores throughout the nation. It has presence in Retail Banking, Home Loans, Commercial Line of Credit, and Credit Card Services

Challenges:

- Simplify access policies, and prevent unauthorized access
- Create a centralized process for monitoring and managing access control and provisioning
- Address multiple password issues faced by client in order to access various silo applications
- Implement a security tight audit mechanism for control and log purposes

Solution:

Deploy an Identity and Access Management Solution that will enable continuous compliance with both federal regulations, such as Sarbanes-Oxley, and its own corporate policies

End Benefits:

Solution implementation is enabling simplified Security Policy structures; helping in reducing management and support center costs and improve efficiency across the board
